iNSIGHTS AI Productivity Track

🔥 Problem Statement

For Problem statement : Visit https://thorecoin.com/

"Search Less. Solve More."

Build an AI-powered execution system that enables users to seamlessly move from **idea → research → content → learning → output** within minutes.

In today's landscape, students, developers, and creators face fragmented workflows:

- Searching across multiple platforms
- Structuring ideas manually
- Creating content separately
- Learning tools without guided execution

Despite access to powerful AI tools, **execution remains slow, disconnected, and inefficient**.

👉 Your challenge is to design an **integrated AI productivity workflow using iNSIGHTS** that transforms how users think, build, and share ideas.

🎯 Objective

Design and develop a **working prototype using iNSIGHTS AI + Project HUB** that enables a seamless pipeline:

> **Idea → Deep Research → Project Creation → Content Generation → Learning → Output**

Your solution should demonstrate how AI can unify fragmented processes into a **single, efficient execution system**.

🧠 Core Requirements (Mandatory)

All participating teams must incorporate the following components from the **iNSIGHTS ecosystem**:

1. 🔍 Deep Search Engine

- Use **iNSIGHTS Deep Search** to explore a selected topic or problem
- Extract and present:
  - Structured insights
  - Key trends
  - Solution frameworks

2. 🏗️ Project HUB

- Create a **live project** within Project HUB
- Clearly define:
  - Problem Statement
  - Proposed Solution
  - Workflow / Execution Plan

3. 🎨 Creatya (AI Content Engine)

Use Creatya to generate:

- Social media content (LinkedIn / Instagram posts)
- Project summary
- Captions, hooks, or engagement content

4. 🎓 AI Courses / AI Buddy

Leverage AI learning tools to:

- Understand relevant tools, concepts, or technologies
- Generate a structured learning path
- Integrate learning directly into your solution workflow

💡 Suggested Solution Directions (Optional)

Participants are encouraged to explore innovative applications such as:

- AI-powered student productivity assistant
- AI-driven research-to-content pipeline
- AI startup idea validator
- AI learning + execution ecosystem
- AI content creation system for creators and founders

🚀 Evaluation Focus

Your solution will be evaluated based on:

- **Innovation & Creativity**
- **Seamless Integration of iNSIGHTS Tools**
- **Execution Efficiency (End-to-End Workflow)**
- **Practical Usability & Real-World Impact**
- **Clarity of Problem & Solution Design**
